Sequence 3742, Application US/09134001C

Patent No. 6380370

GENERAL INFORMATION:

APPLICANT: Lynn Doucette-Stamm et al

TITLE OF INVENTION: NUCLBIC ACID AND AMINO ACID SEQUENCES RELATING TO STAPHYLOCOCCUS

TITLE OF INVENTION: EPIDERMIDIS FOR DIAGNOSTICS AND THERAPEUTICS

FILE REFERENCE: GTC-007

FILE REFERENCE: GTC-007

CURRENT APPLICATION NUMBER: US/09/134,001C

CURRENT FILING DATE: 1998-08-13

PRIOR FILING DATE: 1997-11-08

PRIOR FILING DATE: 1997-11-08

PRIOR FILING DATE: 1997-08-14

NUMBER OF SEQ ID NOS: 5574
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     73.5%; Score 36; DB 4; Length 1551;

Sequence 15, Application US/09736076

Patent No. US20020049301A1

GENERAL INFORMATION:
APPLICANT: BEN-SEASON SHORT PEPTIDES WHICH SELECTIVELY

TITLE OF INVENTION: MODULATE THE ACTIVITY OF SERINE/THREONINE KINASES

FILER REFERENCE: 1242.1015-009

CURRENT APPLICATION NUMBER: US/09/736,076

CURRENT FILING DATE: 2000-12-13

PRIOR APPLICATION NUMBER: US/08/861,338

PRIOR PILING DATE: 1997-05-21

NUMBER OF SEQ ID NOS: 68

SOFTWARE: FastSEQ for Windows Version 4.0

SEQ ID NO 15

LENGTH: 9

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                        June 9, 2004, 10:56:30; Search time 15.0652 Seconds (without alignments) 37.695 Million cell updates/sec
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence 19, A

Patent No. 6174993
GENERAL INFORMATION:
APPLICANT: Ben-Sascon, Shmuel A.
TITLE OF INVENTION: MODULATE THE ACTIVITY OF SERINE/THREONINE KINASES NUMBER OF SEQUENCES: 22
CORRESPONDENCE ADDRESS:
ADDRESSE: Hamilton, Brook, Smith & Reynolds, P.C.
STREET: Two Militia Drive
                                                                                                                                              Sequence 4

COMPUTER READABLE FORM:

COMPUTER: IBM PC compatible

OPERATING SYSTEM: PC-DOS/NS-DOS

SOFTWARE: Patentin Release #1.0, Version #1.30

SUSTRARE: Patentin Release #1.0, Version #1.30

CURRENT APPLICATION DATE: 21-MAY-1997

TLING DATE: 21-MAY-1997

CLASSIFICATION: 514

ATTORNEY/AGENT INFORMATION:

NAME: Brook, David E.

REGISTRATION NUMBER: CMC-590

TELEPHONE: (781) 861-540

TELEPHONE: (781) 861-540

INFORMATION FOR SEQ ID NO: 19:
SEQUENCE CHARACTERISTICS:
LENGTH: 11 anino acids

TYPE: amino acid

STRANDEDNESS: not relevant

TOPOLAGY: Und relevant

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            .
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              DB 2; Length 344;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         1; Indels
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Sequence 3, Application US/08974655
Patent No. 5972676
GENERAL INFORMATION:
APPLICANT: Plowman, Gregory
APPLICANT: Mossie, Kevin
TITLE OF INVENTION: DIAGNOSIS AND TREATMENT OF AUR-1
TITLE OF INVENTION: AND/OR AUR-2 RELATED DISORDERS
NUMBER OF SEQUENCES: 29
CORRESPONDENCE ADDRESS:
ADDRESSEE: Lyon & Lyon
                                                                                                                                                      APPLICANT: Plowman, Gregory

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    δ
                                                                                                                                                                                                                                                                                                                                                                                    US-09-739-455-12

Sequence 12, Application US/09739455

Patent No. 6413756

GENERAL INPORMATION:

APPLICANT: YAN, Chunhua et al.

APPLICANT: YAN, Chunhua et al.

TITLE OF INVENTION: ISCLATED HUMAN KINASE PROTEINS, NUCLEIC

TITLE OF INVENTION: THEREOF

TITLE OF INVENTION: THEREOF

TITLE OF INVENTION: THEREOF

TITLE OF INVENTION: THEREOF

CURRENT APPLICATION NUMBER: US/09/739,455

CURRENT APPLING DATE: 2000-12-19

NUMBER OF SEQ ID NOS: 23

SOFTWARE: FastSEQ for Windows Version 4.0

SEQ ID NO 12

LENGTH: 303
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       GENERAL INFORMATION:
APPLICANT: YAN, Chunhua et al
APPLICANT: YAN, Chunhua et al
TITLE OF INVENTION: ISOLATED HUMAN KINASE PROTEINS, NUCLEIC
TITLE OF INVENTION: ACID MCLECULES ENCODING HUMAN KINASE PROTEINS, AND USES
TITLE OF INVENTION: THERROF
FILE REFERENCE: CLOOG653
CURRENT FILING DATE: 2000-12-19
NUMBER OF SEQ ID NOS: 23

SQUENCE 19, Application US/09736076

Patent No. US20020049301A1

GENERAL INFORMATION:

APPLICANT: Ben-Sasson Shmuel A.

TITLE OF INVENTION: MODULATE THE ACTIVITY OF SERINE/THREONINE KINASES

FILE REFERENCE: 1242.1012-009

CURRENT APPLICATION NUMBER: US/09/736,076

CURRENT FILING DATE: 2000-12-13

PRIOR PILING DATE: 1997-05-21

NUMBER OF SEQ ID NOS: 68

SOFTWARE: FastSEQ for Windows Version 4.0

ELENTH: 11
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Gaps
